

C-100 CAPACITANCE DECADE BOX

The C-100 offers 5 decades of Capacitance ranges.

Slide switches allow easy addition and subtraction of capacitance values. Binding posts offer simple and secure connections.

A precision instrument that allows you to simulate different capacitance values.

No need to keep a large stock of individual capacitors. Speeds up circuit design and testing and commonly used in electronic testing, calibration, circuit prototyping, and educational labs.

SPECIFICATIONS

Ranges	0.1nF to 11.111 μ F (0.1nF step)
Internal Capacitance	0.05nF
Voltage Limit	50V DC
Connection	Three (3) binding post
Accuracy	5%
Dimensions	140mm \times 130mm \times 48mm
Weight	260g
